

Vistral

- Elegant
- Low profile
- Unobtrusive

A dual purpose luminaire, Vistral has been designed for internal use in a wide range of prestigious locations such as hotels, restaurants, hospitals and offices.

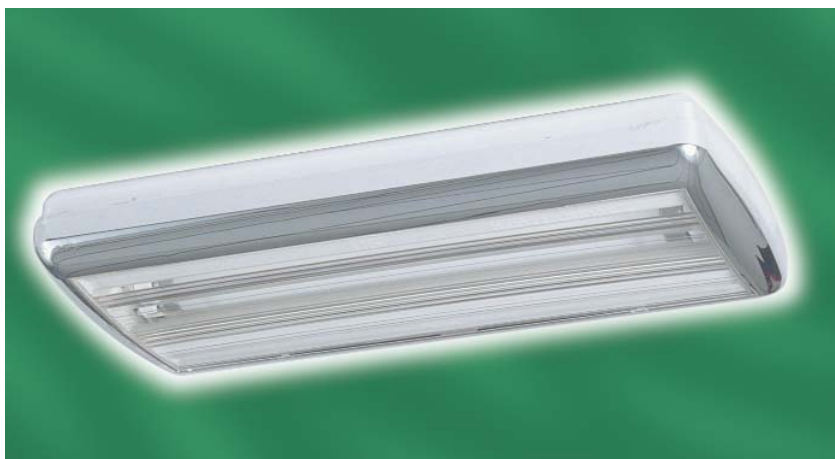

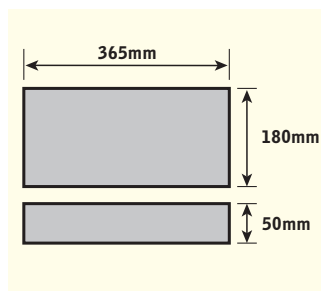

The luminaire incorporates a clear fresnel lens and is designed to be as unobtrusive as possible to blend in with mains lighting and decor.

Vistral is available in maintained, non-maintained and slave versions.

All mouldings are manufactured from tough, self-extinguishing, vandal resistant polycarbonate and ABS.

For ease of installation the gallery is held in position by two keyhole slots.

Both versions carry the Menvier three year guarantee.
